

2-10-0 LOCOMOTIVE CHASSIS - R.065, "Evening Star"
as produced from January 1977

Powered by Tender Drive. Detachable Tenders with either Type 2 or Type 3 Ring Field Motor Units are suitable for this Locomotive.
For Type 2 see Service Sheet No. 98A.
For Type 3 (Late 1977) see Service Sheet No. 104.

Flangeless Wheel assembly X.812 is fitted into the central position. X.811 Flanged Wheel assemblies are fitted in the other four positions.

The Bushed Driving Wheels (S.4278) on the X.811 assemblies must be on the RIGHT side of the Locomotive.

Good electrical contact must be maintained through the Loco/Tender coupling. Ensure that the Drawbar/Contact assembly and the Tender Contact Pin are undamaged, clean and free from oil.

For older models of 2-10-0 Locomotives R.550 and R.861 with semi-permanent Loco-Tender coupling see Service Sheets Nos. 91 and 98A.

Modifications are made to models from time to time. If a spare part is required which does not coincide with the illustration, a full description should be given and, if necessary, a sketch or sample should accompany the order.
