

## IMPORTANT

**TRACK RAILS**—MUST be kept clean (dirty and damp rails will prevent electrical contact). Brush the track free of all dirt and dust. Wipe rails regularly with slightly oily cloth.

**PICK-UPS**—Keep clean and free from fluff. Both Pick-ups MUST make even contact with the rails. Braid ends should be spread out sufficiently to cover the width of each rail, but not beyond it.

**OILING**—DO NOT OVER OIL the electric motor. Axle bearings should be lubricated.

**HAND THROTTLE**—Use with caution before attempting high speeds. Skilful use can prevent serious damage to your motor-cycle.

**BANKING**—Use SCALEXTRIC banking equipment for faster racing. Banking assists even wear and longer life on Pick-ups.

### SPARES AND SERVICING

Contact your official **SCALEXTRIC** Service Dealer who is fully stocked, qualified and equipped for maintenance purposes.

(See Service Scheme Brochure)

## MOTORCYCLE & SIDECAR

OCCASIONAL MAINTENANCE WILL BE NECESSARY TO KEEP IT RUNNING AT ITS PEAK CONDITION. WE THEREFORE RECOMMEND YOU TO STUDY AND FOLLOW THE SIMPLE INSTRUCTIONS GIVEN IN THIS LEAFLET.

### TELEVISION SUPPRESSION

In order to minimise Television Interference Scalextric equipment is fitted with suppressors. Under normal conditions these are adequate. But we recommend consulting your local G.P.O. Authorities if this suppression is not sufficient to deal with conditions in your locality.
